

YAY!

NO POWER OUTAGES THIS WEEK

Clayton Public Power strives to provide the most reliable electric service available anywhere. Our reliability record, preventive maintenance program, and staff training have qualified us for the coveted Reliable Public Power Provider or RP3 designation from the American Public Power Association. From time to time, we do experience service interruptions. To make sure you are aware of what caused the interruption and how long the power was out, we post our service report on a weekly basis.

If you have specific questions about the report or a service interruption event, please call the Town of Clayton Operations Center at 919-553-1530.
